

Demo Ski List 2019.2020 MENS

Updated January 24, 2020

BRAND MODEL DESCRIPTION LENGTH

Blizzard Cochise The Cochise is a 108mm all mountain/powder ski. The rocker camber rocker profile combined with 2 sheets of metal creates a feeling of precision and stability. Add in a progressive tip and tail taper and the soft snow compatability is great.

Blizzard Scout The Scout is the metal-less version of the Cochise. It offers the same great soft snow performance as the Cochise and is only slightly less stable on hard pack compared to it's big brother, the Cochise.

Blizzard Rustler 10 The Rustler 10 has a progressive waist width depending on length, at 172cm this ski is 102mm underfoot and is a perfect do everything ski no matter the conditions. Combining a carbon flipcore with a rocker camber rocker profile creates a super stable and powerful feel on groomers.

Blizzard Brahma The Brahma is an 88mm underfoot on piste carver. The carbon flipcore sandwiched between two sheets of metal creates a super stable ski that can hold an edge at any speed. Truly the ultimate all mountain carving ski from Blizzard.

Elan Ripstick 96 181

The Ripstick series is Elan's true freeride ski that doubles as an all mountain carving ski. The 96mm underfoot is a super versatile ski that floats in powder and rips on groomers. The amphibio technology can be found on all Ripstick models and allows the skis to track together when carving.

Elan Ripstick 106 174
188

The ripstick 106 shares all technology's to the more narrow models. However it is softer in flex in both the tip and tail to allow for more playfulness and bounce in deep snow

Elan Ripstick 88 156
172

The ripstick 88 shares all the technology's to the 96 model but with added stiffness in the tip and tail to improve on piste performance.

Elan Amphibio 84 xTi 176

The elan amphibio 84xTi is an extremely versatile ski. Great for intermediate skiers who are starting to push their skis harder. There is a dedicated left and right ski due to the amphibio technology which truly enhances the skis turning capabilities. with added camber along the inside edge to grip the snow tip to tail, and a rockered outside edge to allow for easy turn initiation these skis track together effortlessly.

184

Elan Ripstick Jr. 86

The ripstick 86 junior shares all similarities to the adult version but with a softer wood core to allow lighter weight kids/teens to be able to properly flex the ski.

158

Nordica Enforcer 88

The enforcer series from nordica is a versatile family that can be used for anything on the mountain. Especially well balanced thanks to its wood core sandwiched between two metal sheets with carbon stringers running throughout the ski is at home laying down turns on groomers and blasting through crud. This ski is 88mm underfoot which yearns to turn, very quick edge to edge making a great groomer ski.

Nordica

Enforcer 93

The enforcer series from nordica is a versatile family that can be used for anything on the mountain. Especially well balanced thanks to its wood core sandwiched between two metal sheets with carbon stringers running throughout the ski is at home laying down turns on groomers and blasting through crud. This ski is 98mm underfoot which yearns to turn, very quick edge to edge making a great all around carving/freeride ski

185

Nordica

Enforcer 100

The enforcer 100 is the widest of the 3 enforcer demo's we offer. Being 100mm this ski is more so tailored towards off piste skiing but still has great performance on groomers as it shares the same core technologies as it's two narrower models. A great all around freeride ski ready to conquer anything the mountain has to offer.

185

Nordica

Navigator 80

The Navigator series from Nordica is the most progressive ski Nordica offers. Constructed with a hexagonal titanium core, the navigator uses essentially a metal grid as opposed to a full sheet of metal, this makes the Navigator lighter in weight and softer in flex compared to the Enforcers. This ski is 80mm underfoot making it the perfect ski for laying down turns on groomers.

Nordica Navigator 85

The Navigator 85 has an emphasis on versatility. This ski is perfect for people who mostly find themselves on piste but will chase fresh snow when available. The early rise along with taper in the tips allow for easy maneuverability in fresh snow.

172

K2

Mindbender 90
Ti

The mindbender 90ti is the perfect ski for taking intermediate level skiers to advanced skiers, but will still please expert skiers. This ski has exceptional torsional rigidity provided by two sheets of metal meaning this ski can hold its own blasting through crud and has amazing edge hold when laying down turns. The 90mm waist makes for a great carving ski but is still wide enough to get you through deeper days.

177

K2

Mindbender 99
Ti

A great one ski quiver. The Mindbender 99ti shares all the great technologies that the 90ti has to offer, paired with a 99mm waist makes this a ski you can use any day of the season. Whether it's a knee deep powder day or hardpack corduroy day, the Mindbender 99ti does it all.
